Senior Software Engineer – B2B Fintech

Description

The Experiments team builds growth engines for Xendit through experimental products. Xendit does this by pushing the frontiers of what is possible in the industry and creating modern solutions to old problems.

The team is looking for an experienced software engineer to innovate and iterate our way to a great solution. It will help if you have a strong interest in growth (personally and professionally) and, therefore, a continuous improvement mindset.

Xendit also highly regard someone that is unyielding in reliable, scalable, and readable code.

You will join a small technical team and make technical decisions that will drive growth for our company. To solve for customers, you will also work closely with our business teams and work directly with our CEO.

Responsibilities

- Build entire business tech solutions as experiments with best practice and scalability in mind
- Build tooling to help us do that easier
- Help guide business requirements with technical feasibility and constraints
- Do whatever it takes to make Xendit succeed

Qualifications

- 2+ years of a successful track record of developing quality software products and shipping production-ready software
- Bachelor's or Master's degree, preferably in Computer Science, or equivalent experience
- Experience in any of the following: Node.js – TypeScript, Golang
- Experience with relational and NoSQL database schema design and query optimization
- Strong knowledge of REST and pub/sub design patterns
- Experience with unit, integration, and E2E test frameworks
- Experience with Agile development
- Ability to break down complex business requirements into technical requirements
- Ability to architect distributed systems on cloud computing platforms
- Thrive on being independent and have proven you can push towards a goal by yourself
- Communicate well

You may have an advantage if

- Familiar with Domain-Driven Design
- Comfortable with modern DevOps: k8s, terraform

Hiring organization

Xendit

Xendit is a financial technology company that provides payment solutions and simplifies the payment process for businesses in Indonesia, the Philippines and Southeast Asia, from SMEs and e-commerce startups to large enterprises.

Xendit enables businesses to accept payments, disburse payroll, run marketplaces and more. The platform is known for its speed (fast integration, builds), simplicity (easy integrations, pricing), and world-class 24/7 customer support. Amidst the fragmented payment landscape in Southeast Asia, Xendit enables businesses to accept payments from direct debit, virtual accounts, credit and debit cards, eWallets, retail outlets, and online installments.
